SaaS Implementation: Stay Primed for Innovation

apps associates®

According to Gartner, 80% of software providers will have migrated to a subscription-based business model by 2020. With the SaaS market reaching over $164 billion, the message is clear – SaaS applications are where today's innovation happens. SaaS enables new features, an improved release processes, and world-class analytics. With a modernized integration platform, you can get business done today while futureproofing for tomorrow.

Your IT budget is meant for more than plugging holes or monitoring applications. Your finance, HCM or supply chain arm can't be competitive if they're still using Excel spreadsheets. Those days are over. SaaS is the "secret sauce" to achieving massive cost savings, increasing efficiencies and allocating your resources time to more business critical activities. Never upgrade again – now you can actually focus on running your business instead of running your applications.

However, migrating and implementing SaaS can cause disruptions to your business if executed poorly – from disparate data silos to process gaps and user dependencies. That's where we come in. We're here to help seamlessly migrate you over to industry standard SaaS platforms, including Oracle ERP Cloud, Oracle EPM Cloud, Oracle HCM Cloud, Oracle SCM Cloud, and Salesforce – reducing total cost of ownership and time to market compared to taking it on yourself.

We're also experts in supporting migrations from existing ERPs - like EBS, Net Suite, PSFT, MSFT Dynamics, Sage and QuickBooks – regardless of whether you have 60 data fields to migrate or 6,000. We've completed 120+ Oracle Cloud Applications Implementations, so you could say that we know what we're doing.

We're here to help seamlessly migrate you over to industry standard SaaS platforms, including Oracle ERP Cloud, Oracle EPM Cloud, Oracle HCM Cloud, Oracle SCM Cloud, and Salesforce.

Oracle ERP & EPM Cloud

Issues with forecasting and budget accuracy? What about real-time reporting on net cash flow, vendor expenses or at-your-fingertips budget v. actual analysis? Empower your finance organization by moving to the cloud.

Unify your business processes and enable the flow of data between them by migrating your ERP systems and creating a "single source of truth." No need to worry about data migration – with Apps, data movement is a breeze – we'll have integration teams available to support data transfer between Oracle Cloud and non-Oracle systems.

While you're at it, take advantage of economic, easy to deploy cloud-based solutions like Oracle's EPM Cloud—a suite of software modules including Planning and Budget Cloud Service (PBCS), Financial Consolidation and Close Cloud (FCCS) that enable you to drive predictable performance and report with confidence.

Oracle SCM Cloud

From management to procurement, the cloud can help you every step of the way. Say hello to real-time order management, supplier qualification, strategic material sourcing, integrated demand analysis, supply planning and more.

Experience the power of different cloud modules – as the leading implementation partner for Oracle SCM Cloud, our team is well-versed with Planning Central, Order Management, Global Order Promising, Manufacturing, Inventory, Purchasing, Procurement Contracts, Product Hub and the Supplier Portal.

But that's not all… we'll also provide workshops to fill gaps in out-of-the box functionality and provide process training for transactions in the modules being implemented to ensure your migration process is seamless.

Oracle HCM Cloud

Recruitment and retention in today's tight job market is challenging. Take your Human Capital Management to the Cloud and redefine the business of HR to provide value to every employee.

Get ready to truly unlock the potential of your workforce by implementing an HR system that helps manage payroll, benefits and performance management.

Salesforce

Upgrade your approach to sales. There's a better way than managing your customer service efforts through your inbox.

From Sales Cloud to Einstein Analytics or Salesforce Lightning and CPQ, we'll equip you with the tools you need to be truly competitive. We can even help you see the bigger picture – with full, seamless integration across all your business systems (Oracle, ERP and Salesforce).

What does this mean for you? Benefits include:

- ✓ **Best-practice business processes that support a global standard of configuration, with or without customization**
- ✓ **Support for global organizations with seamless data integration across business networks and departments**
- ✓ **Functional team members onsite with you every step of the way to lead the team and answer questions as they arise**
- ✓ **Business intelligence and Hyperion skill sets help round out our offerings and embedded tools**
- ✓ **Rapid deployment**
- ✓ **Dramatic cost savings on infrastructure or IT support**
- ✓ **Roadmap development and future-proofing support**
- ✓ **Compliance concerns? No problem. Our flexible approvals engine will streamline business processes and ensure Oracle compliance**

We help transition your business applications that are ready to go to SaaS – and help put the rest in private, public or multi-cloud environments until you're ready – to save you money on server space, IT staff and other infrastructure that on-premise apps require.

And we can support your further with Apps Associates Application Managed Services. We manage your entire tech stack to help you reduce costs and stay focused on strategic, high-value activities. With our managed services, you get ongoing incident resolution, continuous improvement, optimization of your environment and advisory services to offer your business a single source of expertise and accountability. We also take a proactive approach to make sure that you are leveraging features and functionality that will benefit your organization and provide consistent value to your customers.
