

Modernize and Transform on Oracle Cloud Infrastructure

We know that today's business landscape is as competitive as ever making it crucial to maximize efficiency and productivity while minimizing costs throughout your organization. Oracle Cloud Infrastructure can help.

The Benefits of OCI

Oracle Cloud Infrastructure (OCI) is a scalable, highly-available and cost-effective cloud platform created to meet the demands of today's enterprises. OCI can provide many benefits for your business by allowing you and your organization to adopt a cloud framework where you can plan, adapt and iterate while your organization undergoes its transformation to the cloud.

Many enterprises have already successfully migrated their Oracle applications and workloads to OCI and are seeing the benefits of that migration, including:

The image shows a light blue rounded rectangle containing seven icons arranged in two rows. Each icon is centered above a horizontal line, which is above the text label for that benefit. The labels are in a red, sans-serif font.

- High Availability:** Icon of a calendar with a clock and a 24/7 indicator.
- Resiliency:** Icon of a person with a red arrow pointing left towards a blue signal wave.
- Security:** Icon of a shield with a padlock.
- Scalability:** Icon of a bar chart with an upward-pointing arrow.
- Change Control:** Icon of three people with a gear and arrows between them.
- Flexibility:** Icon of a cube with arrows pointing outwards from its faces.
- Consistency:** Icon of a target with four arrows hitting the bullseye.

All these benefits can help propel your business forward in a cost-efficient platform, and Apps Associates can help you every step of that journey. We work with customers to form a strategy to align business requirements with technology to derive the most value from OCI investments. Additionally, you can earn up to \$.33 for every dollar you spend on OCI toward your Oracle Support costs with OCI's [Cloud Support Rewards](#).

Meeting You Where You Are in Your Cloud Journey

To help you get started on your path to OCI, Apps Associates provides recommendations through several assessment offerings such as:

Cloud Strategy
and Readiness

Process Improvement and
Platform Optimization

Application Roadmap and
Upgrade Workshops

Business Case Creation
and TCO Analysis

Wherever you are in your Cloud journey, Apps can meet you there. With the extensive portfolio of OCI services, finding the right partner with the right expertise is critical; therefore, every member of our cloud services team is required to have OCI accreditation, certification and multi-dimensional experience. As an Oracle partner since 2002, we were one of the first to start migrating these business-critical applications to the Cloud. So, whether you are running Oracle E-Business Suite, Oracle PeopleSoft or other enterprise Oracle applications including Hyperion and Oracle Business Intelligence (OBIEE, OBIA), Apps Associates can help you pave the way towards reduced costs and increased efficiency.

You want to work with a partner that understands the full range of complexity when undertaking the planning, migrating, integrating and managing multiple business applications in the Cloud—that's us. We create scalable client-centric solutions that translate into immediate business impact for you.

About Apps Associates

Apps Associates is a premier enterprise applications and technology advisor, counseling and executing across every stage of the enterprise transformation journey—not just the destination. For more than two decades, Apps Associates has closely collaborated with decision makers across nearly every industry, offering end-to-end integration, modernization, and cloud migration services. By helping to break down the silos within today's most complex business challenges, Apps Associates is unlocking solutions and efficiencies that scale into future opportunities.
