

Apps License SafeGuard – Extend beyond standard usage reporting

Apps Associates created Apps License SafeGuard to provide customers a powerful Oracle Fusion SaaS Applications subscription usage management tool that gives full visibility and real-time cost map based on specific subscription entitlements, and current system configuration. With this data, it is easy to understand what is being used and make business decisions based on the subscription cost implications.

Apps License SafeGuard is a unique SaaS service developed by Apps Associates that goes beyond basic Fusion SaaS Hosted Named User usage reports to:

- Identify your real cost of user and role configuration
- Uncover hidden costs associated with default roles and unused features

SaaS Subscription Management

With Apps License SafeGuard, you can:

- ✓ Reduce and remediate role and privilege misconfigurations
- ✓ See real time SaaS Subscriptions costs by department, role, user, and others
- ✓ Gain clarity on a role cost prior to deployment
- ✓ Understand the costs associated with your Oracle SaaS deployment in real time

Why Apps Associates?

- ✓ Our mission is to help you transform your business by recognizing the full potential of your Oracle software

Get full transparency and actionable insights

Sample reporting output from Apps License SafeGuard

Hosted Name User - Usage

Understand your costs

With Apps License SafeGuard you can analyze your data a number of ways including:

- By departments to identify drivers of departmental costs
- User based cost in accordance with the user’s service usage
- Role and Grant Visibility – what are they consuming and do they need specific subscriptions

In short, with visibility, there’s understanding, and with relevant details, there’s a basis for informed decisions. Apps License SafeGuard equips you to monitor and adapt subscription consumption to align with your organization’s needs.
